

**CONGRATULATIONS ON YOUR PURCHASE OF AN
"ULTRATANK"**

**NOT JUST ANOTHER BAIT TANK, BUT WITHOUT A DOUBT,
THE FINEST BAIT SAVING SYSTEM EVER DESIGNED!**

"CLEAN WATER MAKES THE DIFFERENCE"

*Please follow the simple instructions below and you will find that your bait
will stay alive and lively many times longer than ever before.*

INSTRUCTIONS:

- 1) The tank is very heavy when full of water and must be securely fastened down to prevent damage or injury. A stainless steel angle iron and bolt set is available. (See accessories below)
- 2) For easy hose attachment and removal, the water inlet fitting has standard male garden hose threads.
- 3) Use 1 1/2" ID hose on the outlet fitting. Hose must run downward and overboard, not up and over the rail or transom, or tank could overflow. Hose not needed on swim step installations.
- 4) Either too much or too little water flow will kill baitfish, but as a rule of thumb, a 20 gallon bait tank should fill in 8 to 12 minutes. Larger tanks take proportionately longer. Many variables affect a pump's output, including not only its capacity, but distance from tank to pump, number of "L" fittings, etc., so adjust the inlet valve accordingly.
- 5) To keep your bait alive and healthy, we strongly recommend using a centrifugal, not a self priming pump, and restricting the speed of your boat to prevent pounding and injuring them. Anchovies are especially fragile!
- 7) Fresh lively bait will catch more and bigger fish, so limit the amount you get to the following:
(From California bait receivers!)
UT-13 1/2 scoop of anchovies and sardines or 7 mackerel.
UT-23 1 scoop of anchovies and sardines or 14 mackerel.
UT-29 1 to 1 1/2 scoops of anchovies and sardines or 20 mackerel.
UT-38 2 scoops of anchovies and sardines or 30 mackerel.

OPTIONAL ACCESSORIES:

- EZ-360 E-Z Release bracket and 360 GPH pump assembly - For UT-13 ULTRATANK.
EZ-500 E-Z Release bracket and 500 GPH pump assembly - For UT-23 ULTRATANK
EZ-700 E-Z Release bracket and 700 GPH pump assembly - For UT-29 and UT-38 ULTRATANKS.
Complete "Ready to go fish'n" packages:
EZ-367 EZ-360 pump assembly (above) packaged with AC-17 hose and accessory kit (Listed below).
EZ-507 EZ-500 pump assembly (above) packaged with AC-17 hose and accessory kit (Listed below).
EZ-707 EZ-700 pump assembly (above) packaged with AC-17 hose and accessory kit (Listed below).

- AC-4 Installation kit with four stainless angle irons and bolts.
AC-5 Thru-transom connector with garden hose threads each side and cap.
AC-10 12 volt waterproof Bait-Lite. (Keeps anchovies and other fragile bait alive at night).
AC-16 Kit with 3/4 "L" hose barb, 2 releasable tie mounts, and a garden hose tank connector with 3/4" hose barb.
AC-17 Above AC-16 kit with 7' of reinforced 3/4" vinyl hose.

*** WHEN SECURING HOLD DOWN BRACKETS TO ULTRA TANKS USE LUBRIPLATE OR EQUIVALENT
ON S/S BOLTS TO PREVENT SEIZING.**
